

- there is a problem that in this app we have breakfast heavy, dinner heavy, balanced, lunch heavy meals and we specify the distribution of each of these no problem, problem is sometimes the program doesn't understand whether each is dinner or snack or what, so I'm telling you and I need you to make sure these are done and test them using several test cases and tell me a report, look at the balanced one and continue based on this the rest and make sure everything in this table is applied: **### 6.1 Balanced Distribution (reference)**

```
| # of meals | Distribution |
|---|---|
| 2 meals | 40%(breakfast) / 60%(lunch/dinner) |
| 3 meals | 25%(breakfast) / 40%(lunch) / 35%(dinner) |
| 4 meals | 25%(breakfast) / 15% (snack) / 30%(lunch) / 30%(dinner) |
| 5 meals | 20%(breakfast) / 10% (snack) / 30%(lunch) / 10% (snack) / 30%(dinner) |
```

### **### 6.2 Breakfast-Heavy Distribution (+5pts to breakfast)**

```
| # of meals | Distribution |
|---|---|
| 2 meals | 45% / 55% |
| 3 meals | 30% / 37.3% / 32.7% |
| 4 meals | 30% / 15% (snack) / 27.5% / 27.5% |
| 5 meals | 25% / 10% (snack) / 27.5% / 10% (snack) / 27.5% |
```

### **### 6.3 Lunch-Heavy Distribution (+15pts to lunch)**

```
| # of meals | Distribution |
|---|---|
| 2 meals | 25% / 75% (2nd slot = lunch/main meal) |
| 3 meals | 18.75% / 55% / 26.25% |
| 4 meals | 18.2% / 15% (snack) / 45% / 21.8% |
| 5 meals | 14% / 10% (snack) / 45% / 10% (snack) / 21% |
```

### **### 6.4 Dinner-Heavy Distribution (+15pts to dinner)**

```

- | # of meals | Distribution |
- |---|---|
- | 2 meals | 25% / 75% |
- | 3 meals | 19.2% / 30.8% / 50% |
- | 4 meals | 18.2% / 15% (snack) / 21.8% / 45% |
- | 5 meals | 14% / 10% (snack) / 21% / 10% (snack) / 45% |

```

another point:

- i need the meal list of the options in each meal to be a loop and not a list, like a circular list
- make the arrow that alternates between meals be a in a fixed position since it changes position based on how many foods exist in the meal. and i want the arrow to just have a representative look man it looks so bad

apply these points and make simple tests to make sure they are applied correctly with no bugs and that they are tested in their edge cases and verified, at the end give me a report.
